

Why FIFO avoids disputes in dining halls?

1. **Fairness** – Students are served in the order they arrive. Nobody feels cheated because the first to arrive is the first to eat.
2. **Predictability** – Everyone in line knows their position and when their turn will come, reducing anxiety and confusion.
3. **Prevents Cutting in Line** – because system use **First-In, First-Out**, no one can skip ahead .
4. **Reduces Conflict** – If service followed LIFO (stack), the last to arrive would always eat first, causing anger and disputes. FIFO removes this problem.
5. **Efficiency** – The line moves smoothly, avoiding crowding at the serving point.
